## DETAILED ACTION

### *Information Disclosure Statement*

1. The information disclosure statements filed 11/07/05, 08/10/05, 06/17/05, 04/07/05, 01/28/05 and 03/17/04 have been considered and made of record. Copies of the 1449s associated with these IDSs initialed, dated and signed by the Examiner are included herewith.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-24 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 7,045,223. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present claims completely encompass the patented claims.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Cullen (USPN 3,763,158).

Cullen teaches a single crystal spinel material of  $\text{MgO}:\text{Al}_2\text{O}_3$ , wherein the molar ratio of the magnesia and alumina is 1:3.2 (col. 2, lines 21-40). Regarding claims 2-8 and 18-21, since the material of Cullen is the same as that presently claimed, it is the Examiner's position that the prior art materials will inherently exhibit the presently claimed properties. With respect to claims 22-24, these claims merely recite intended use and are not seen to distinguish over the applied prior art.

6. Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Wang (USPN 4,370,739).

Wang discloses a single crystal spinel material  $\text{MgO}:\text{Al}_2\text{O}_3$ , wherein the molar ratio of the magnesia and alumina is 1:1 to about 1:2.5 (col. 2, lines 21-40). Regarding claims 2-8 and 18-21, since the material of Cullen is the same as that presently claimed, it is the Examiner's position that the prior art materials will inherently exhibit the presently claimed properties. With respect to claims 22-24, these claims merely recite intended use and are not seen to distinguish over the applied prior art.
